FLARE

Maximize Content Reuse and Streamline Content Delivery

Manage Your Entire Content Development Workflow with MadCap Flare

From importing and content creation, to subject matter expert contribution and review, to multi-channel publishing, translation and integrated cloud-based workflows, MadCap Flare is unmatched in its power, versatility, and ability to scale for any size team or organization.

Easy Content Import

Advanced Content Development

Streamlined Review Workflows

Multi-language Support

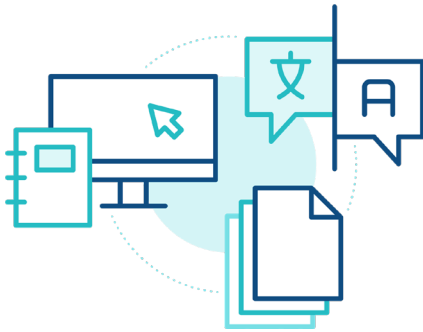

Publish Responsive Content

Project Analysis and Reporting

Why Choose MadCap Flare?

Advanced Single-Sourcing

Single sourcing is the practice of reusing common content throughout your documentation and other content deliverables. From a single source, you can create multiple versions, publish multiple output formats and translate content into any number of languages.

MadCap Software continues to innovate with features that you simply cannot find on any other platform – such as micro content authoring – that give us the ability to provide amazing user experiences for our customers.

Paul Pehrson | Sr. Information Developer, Venafi

Powerful Multi-Channel Publishing

Multi-channel publishing allows you to publish your content to many different output formats, all from a single Flare project. Deliver multiple format types to your end users at very little incremental cost, while streamlining content delivery.

Import Legacy Content

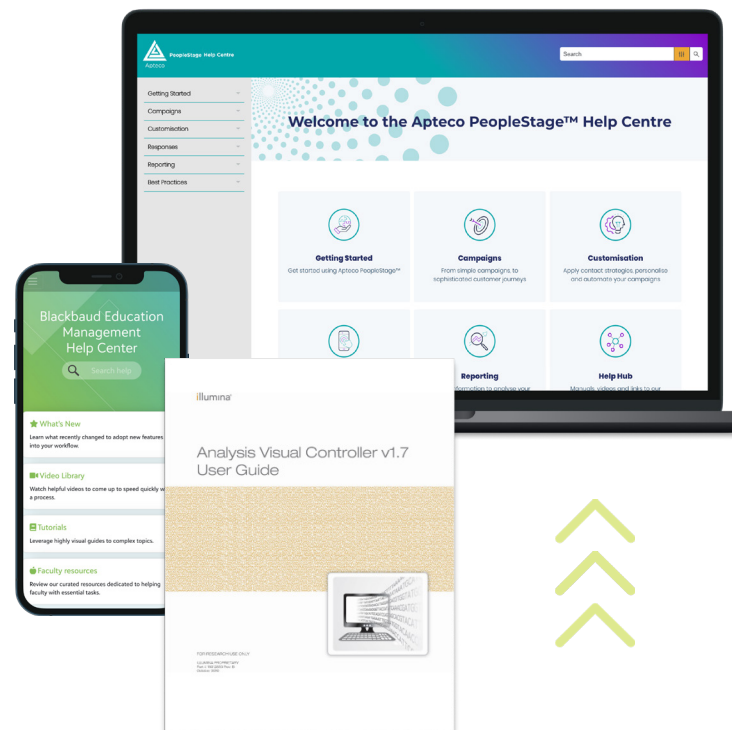

- » Microsoft® Word™
- » Microsoft® Excel
- » Adobe® FrameMaker®
- » Adobe® RoboHelp®
- » HTML
- » XHTML
- » CHM
- » DITA

LATEST CUSTOMER SUCCESS STORY

Today's Consumer Demands Superior Content Experiences – And Rivian Delivers

In addition to the digital in-vehicle owner's guide, Rivian leverages MadCap Software to streamline documentation for its chargers, accessory products, and enterprise software system.

The interactive, in-dash vehicle guide we've created with Flare is integral to creating a superior experience for our customers.

David Jackson
Director,
Technical Publications
