Do you have products you need to document?

Our customers put their trust in our decades of experience – from practice for practice – and we view this trust as a major compliment of our work.

Operating manuals, user manuals, or maintenance, training and servicing instructions, data sheets or spare parts lists and product catalogs, all in conformity with directives – we research, prepare, document, design and format the information, in all required languages. Predefined layouts and editing guidelines are accurately harmonized with customer-specific processes.

When creating graphics, illustrations, exploded diagrams and 3D animations, utilize the expertise of gds as a reliable element for your company.

Basically, we work with the tools you give us.

Alternatively, we use the gds editorial systems XR or docuglobe. This lets you benefit from the many possibilities of modularization, standardization and structuring without having to purchase an editorial system.

A focus on benefit

- You boost the quality of your documentation.
- You increase your time and economic flexibility.
- You reduce your fixed costs.
- You benefit from the options of an editorial system without having to purchase it.
- You reduce editing and translation expenses by up to 40%.
- You increase the legal security of your technical documentation and reduce your liability risk.
- You protect yourself considerably against damage claims.
- You take advantage of a comprehensive project management system for complex and multilingual projects.

Direct contact and exchange

Email is a thing of the past – we offer you a wide range of state-of-the-art communication options, from cloud-based data exchange and collaborative working to online research via augmented reality.

Digital Only Concept

The Digital Only Concept lets you deliver your operating instructions to the devices in digital form only.

This paperless process is, of course, not only legally but also directive compliant, while also providing a high level of benefit for your clients and service staff.

Advantages of digital documentation:

- Saves costs by publishing your operating manual in digital form only
- Increased flexibility regarding the operating manual's completion date (time span between packaging and commissioning)
- Compliance with all legally relevant requirements

In preparation, we first evaluate and interpret the relevant directives and standards.

This is followed by the development of a transport instruction, the “excerpt of the original operating instructions” and a process risk assessment.

Our content delivery portal easybrowse, which can specifically deliver content to various groups, can also be used to provide information.

Make use of our years of experience

Technological and industry-specific experience is of the utmost importance for the editorial process. Take advantage of our specific industry experience in the areas listed in alphabetical order below.

Agricultural and rural technology

- Fertilizer technology
- Feeding techniques
- Greenhouse technology
- Non-self-propelled agricultural machinery
- Tractors and trailers
- Self-propelled agricultural machinery
- Automated livestock breeding

Plant and machine technology

- Equipment manufacturing
- Drilling technology (deep drilling rigs)
- Chemical processing technology
- Printing technology
- Conveyor technology
- Catalytic converter technology (exhaust gas purification)
- Power plant technology (biogas, block heating technology)
- Refrigeration / Temperature control
- Logistics systems / Material flow solutions
- Test benches
- Pump technology
- Recycling
- Solar technology
- Fully automatic dispensing systems
- Jigmaking
- Centrifugation technology (separators, decanters)

Drive system and energy technology

- Biogas plants
- District heating power plants
- Energy storage systems
- Heating systems
- Hydraulic systems
- Compressors
- Pump drive systems
- Transformer systems (nuclear use)

Automotive

- Mounted equipment
- Construction machinery
- eMobility (including peripheral technology)
- Municipal vehicles (e.g. sweepers, waste collection vehicles)
- Motor homes and trailers
- Racing
- Tractors and trailers
- Self-propelled agricultural machinery

Electrical engineering

- Automation technology
- Indoor installation technology
- Power plant technology
- Measuring technology
- Network technology
- Low and high voltage technology
- Control technology
- Transformer technology

Building services

- Consumer products
- Window design
- Gastronomy products
- Building controls
- Domestic electronics
- Security
- Surveillance technology

Laser technology

- Production lasers
- Laser cooling

Pharmaceuticals and medical technology

- Hospital communications
- Clinical medical products
- Personal healthcare devices
- Pharmaceutical production technology and production planning software

Production technology

- Processing centers
- Lathes
- Milling machines
- Plastic production systems
- Production lines
- Grinding machines
- Spectroscopy
- Radiation systems
- Textile technology
- Packaging machines – Foods (bags, packaging, tins), Non Food

Software documentation and Online Help

- Building services
- ERP software
- Medical Technology
- Control software/machine controls
- Environmental software

Special machinery engineering / heavy machinery engineering

- Concrete product machines
- Conveyor technology
- Slag reprocessing, building material recycling

Technical marketing

- Data sheets
- Price lists
- Product brochures
- Product catalogs
- Corporate design
- Illustration
- Design and typesetting

Do you have any questions regarding technical documentation?

We will gladly call you back.

The leading Competence Center for Technical Communication and Information Management

Today, it does not suffice to simply offer editorial systems alone.

gds Group provides a unique full service, encompassing technical documentation with a clear focus on efficiency increase and process optimization.

Our products and services can help you be innovative and successful. Perfectly tailored to your sector of industry, our systems and services will help you achieve your goal easily and quickly — regardless of where in the Content Life Cycle you may need our assistance.

As technical documentation service providers, we can give you everything you need to be productive. No matter where or when, we can support you in realizing your vision and reaching your goals faster.

Our products are tailored to your requirements and not the other way around, because we concentrate on what is really important — you.

Our solutions help you do **everything** you do **simply** (and) **better**.

WE ARE ALWAYS THERE FOR YOU

Let's talk about it. In a personal conversation, we will discuss all of the opportunities available for optimizing and increasing the efficiency of your technical documentation. We will also be happy to visit you.
