INTELLIGENT CONTENT for TECHNICAL PUBLICATIONS (DITA)

the intelligent content company

What is Intelligent Content Tools?

Intelligent Content Tools is a software product on Office 365 that enables Subject Matter Experts, Engineers, Technical Writers, and non-DITA users to contribute content to technical publications in Word while creating DITA XML in the background. With online and offline authoring capabilities, icTools eliminates content friction in organizations and provides a single source of truth for technical publications. Now, with Ictect's patented software, SMEs and Technical Writers can work in Microsoft Word on the same document, and DITA XML is automatically created for publishing.

A Tale of Two Silos

Intelligent Content Tools with Office 365 for Authors and Technical Writers bridges the gap between Product Lifecycle Management (PLM) systems and Content Management Systems (CMS)

- Online Authoring Tool in Microsoft Word
- Bridges the gap between PLM and CMS with Office 365
- Checks publications against style guides
- Creates fully structured DITA XML automatically
- Eliminates the need for document conversions

Product Highlights

For Authors and SMEs

- Simply author in the desktop version of Microsoft Word or Word Online. Minimal user interface and distractions for authors.
- Tools for checking and proper usage of terms, phrases, acronyms, symbols, etc. are based on organizational Style Guides.
- Standard features of native Microsoft Word such as documents co-authoring, versioning, etc. are fully available.
- icTools can be integrated with any PLM system including PTC, ENOVIA, etc. This allows authors to work in Word and submit documents directly to PLM system.
- icTools gets the document ready for your DITA XML and Content Management System.

For Technical Writers

- Write in Microsoft Word and DITA XML is automatically generated in the background.
- Tools for editing DITA XML in Word, and for importing it from other editors such as oXygen, XMetaL, etc.
- Tools for checking compliance against DITA style guide and organizational style guides.
- icTools can be integrated with any CMS or CCMS (Component Content Management System) including SDL, Astoria, Vasont, etc. This allows technical writers to work in Word and submit documents directly to CMS.

Who is this for?

Intelligent Content Tools is for large and small organizations developing technical publications and using DITA XML. Customization of the software can also be made for other types of XML such as S1000D and proprietary XML. Intelligent Content Tools is used by all users contributing to the document.

- Subject Matter Experts
- Engineers
- Technical Writers
- Non-DITA users
