Build Product Hubs with Confluence

Apps for Confluence that ensure your users have the information they need to be successful.

Powered by

What are Product Hubs?

Information at Every Touchpoint

Share all the relevant content and resources about a product with your users, partners, and anyone else who relies on the information to be successful.

Create Online Help Experiences

Build custom help centers, knowledge bases, documentation sites, product portals, and learning hubs.

Share Your Product Information

Publish documentation, guides, enablement material, release notes, roadmaps & more.

Single Source Your Product Content

Author in one place, publish everywhere. Deliver content in multiple formats: Online, directly in your product, or as custom HTML, PDF, or Word files.

Manage Product Documentation

Manage the lifecycle of your documentation: Save versions, manage translations and variants, track changes, and export to custom-styled PDF and Word documents.

Why Confluence?

Create and Collaborate as a Team

Confluence is your team's home for knowledge and documentation. It brings the whole team together in one collaborative workspace where everyone can contribute their knowledge and share information.

Apps for Confluence

Unleash the Potential of Your Products

Scroll is a suite of native Confluence apps that will turn Confluence into a product hub. Easily manage and share your product information wherever and whenever it's needed.

Publish and Share Your Information

Deliver a Branded Experience – Both Online and Offline

Publish documentation in multiple formats and tailor the experience to your liking with a custom domain, layout, logos, and more.

Publish PDF and Word Documents

Turn your content into beautiful PDF and Word documents with rich output functionality and full control over styling.

No Coding Necessary

Use the pre-built theme or the WYSIWYG template editors to customize everything: headers, footers, colors, navigation, and more.

Deliver the Right Content to the Right Audience

Add Version Control to Your Product Documentation

Save, control, and compare versions of your documentation over time.

Create, Manage, and Publish Variants & Translations

Manage conditional content and deliver multilingual documentation - all from a single source.

Check Content Quality and Enforce Style Standards

Create content rules to check broken links, formatting, spelling, inclusive language, and more.
