Intelligent Information Request and Delivery Standard

Intelligent Information for Smart Users

Challenges for Use of Information

Users want to use their mobile devices to get all the information they want and need – in the specific context, individualized, and right on the spot. Therefore, the way in which users interact with machines as well as the way machines interact with machines is a future challenge we are facing.

How Does iiRDS Face These Challenges?

Short for **I**ntelligent **I**nformation **R**equest and **D**elivery **S**tandard, iiRDS is a standard that enables independent communication between individual agreements. This means concretely: manufacturers can easily serve many customers with the information for use they require. Also, customers can easily integrate information for use from many different manufacturers.

With defined Use Cases, iiRDS is applicable in any interested party in any industry where it meets the exact needs of its users.

Why **You** Should Become Part of the iiRDS Consortium

Why a Consortium for the iiRDS?

With the iiRDS Consortium, we look forward to a greater structure with manifold resources and opportunities in order to grow, develop, and lead the iiRDS on its new way.

Your Benefits as a Member…

- Get involved in the further development of the tekom iiRDS.
- Improve your competencies in the field of intelligent information delivery.
- Share your know-how with other experts and decision-makers.
- Be part of the professional technical decision making process.
- Be one of the first to implement new releases ahead of the rest in the Internet of Things.
- Be part of a strong community.

How to Become a Member

If you and your company or university are interested in taking further exciting steps in the Internet of Things, we look forward to welcoming you on board!

The iiRDS Consortium offers various kinds of memberships with different benefits, rights, and obligations. Be a pioneer in one of the most promising and exciting fields: Industry 4.0.
