

# Standards With AI

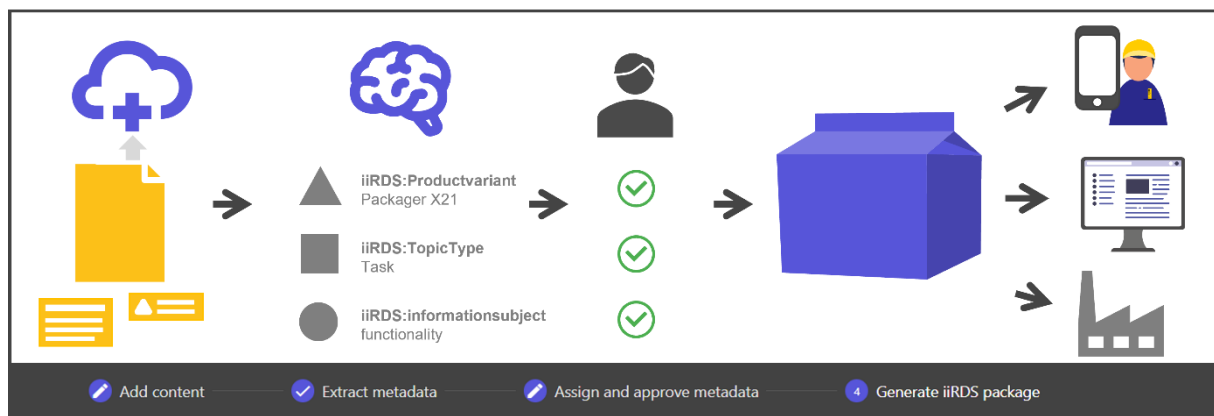

No time for metadata?

## Standardized metadata with AI

You have huge piles of documents and don't know how to deliver them as intelligent information?  
With plusmeta® you will do it in no time!

### In 4 steps to intelligent information:

1. You upload your documents, topics or fragments to plusmeta.
2. Our AI automatically recognizes metadata and can map existing metadata.
3. You check the recognized metadata and confirm it.
4. plusmeta generates an exchange package for intelligent information (iiRDS, VDI 2770).

### Standards for intelligent information are supported:

- ✓ iiRDS 1.1
- ✓ VDI 2770
- ✓ VDE SPEC 90009

### Your advantages at a glance:

- Processing of structured and unstructured content, e.g. supplier PDFs, HTML, etc.
- Transfer of existing metadata, e.g. from your content management system.
- Recognition of iiRDS metadata by our AI.
- Automatic generation of compliant iiRDS packages at the push of a button.
- Direct data exchange with content delivery portals via iiRDS.

Contact us today and we will arrange a non-binding demo.
