

Office Server Document Converter

The Enterprise Server Solution for Document Conversion

High Speed

- Built from the ground up to run on your server environment without relying on Microsoft Office or Adobe to ensure maximum performance and reliability
- Supports multithreaded, high-volume PDF generation and conversion for single or multi-page files

Unlimited Server-Side Conversions

- Designed to run on a server for automated, high volume document conversions
- Convert documents at an enterprise scale from many file formats to PDF and image outputs
- Can run completely offline in an air gapped environment for top security

Seamless Integration

- Easy to integrate document conversion in any existing application or workflow with included APIs - Java, .Net, COM, Command-line, C/C++

Office Server Document Converter

Office Server Document Converter (OSDC) is an independent conversion library used for transforming large volumes of Office documents (Word/Excel/PowerPoint) into PDF or images on a server. It does not rely on Microsoft Office or Adobe so there is no need to worry about additional costs or licensing agreements for external software. OSDC stands out due to ease of use, flexibility, performance on heavy loads, and compatibility with Windows and Linux.

Supported Features:

- Custom select Excel sheets for conversion
- Include PowerPoint slide notes for conversion
- SmartArt and OOX Math Equation conversions
- Ideographic Variation Sequence
- Bidirectional text for Arabic, Chinese, Japanese, Korean and other right-to-left languages
- Internalization & localization in terms of displaying dates in locale format
- Text layout rules for different languages
- PDF annotations when converting from PDFs

Supported Formats:

Input Formats:

- Microsoft Office 97 - 2019 (Word, Excel, PowerPoint)
- PDF 1.3 - 1.7, PDF 2.0
- Image Files (PNG, JPG, GIF, TIFF, BMP, JP2)
- SVG 1.1, SVG Basic, SVG Tiny
- DocuWorks V4-V8
- WMF
- EMF
- CGM*

Output Formats:

- PDF 1.3 - 1.7, PDF 2.0, PDF/A
- SVG 1.1, SVG Basic, SVG Tiny
- Image Files (PNG, JPG, TIFF)
- SWF*
- DINX*
- XPS*

*Available with Plus version

Use Cases:

- Thumbnail and Document Previews: OSDC is integrated in many applications to convert Word, Excel, PowerPoint files to SVG/JPG/PNG formats for easy viewing on mobile device or in a web browser.
- Print Driver: OSDC is the official print driver for a State Legislature printing their amendments. OSDC is used to convert high volumes of Word files to PDF so all lines and page numbers print correctly regardless of printer type.
- Data Migration: OSDC has been used to convert over one million patient files in MS Word to PDF for a health clinic that was migrating to a new Electronic Health Record system. They chose OSDC because of conversion speed, accuracy, and security for patient information.

Available for Windows and Linux
